Data Science Course: Data Wrangling

Mini-Project : JSON

Learning Objective

- Practice working with the JSON format using a real life data set
- Extract and manipulate data in JSON
- Practice your data wrangling skills

Criteria	Meets Expectations
Completion	• The code runs successfully.
Process and understanding	• The correct solutions to the 3 problems are produced. • The submission demonstrates an understanding of each part of the solution. • The submission shows that the code is well commented.
Presentation	• The project is delivered in a Jupyter notebook, uploaded to GitHub, and doesn't contain any unnecessary printouts.

Excellence: Student also produces visualizations of the results, or has multiple approaches to the same problem, especially for question 3.
